- Rate of Growth of the Business

2.Managing Change for Organizational Impro Main Tasks

- Identifying opportunities for improvement
- Leading the process of redesigning structures processes by which work is accomplished
- Sponsoring and championing experimentation

JOB MODEL FOR EXECUTIVE STAFF

INTRODUCTION

This job model includes:

- A summary of the main responsibilities
- A detailed description of the main responsibilities, showing key tasks and performance outcomes/measures
- The core competencies identified as most important for effectiveness in this job, with descriptions of specific behaviors contributing to effectiveness

Note that the core competencies for this job were selected from the larger set of 31 "building block" core competencies. The selected set of core competencies provides a focus for performance management and development for people in the job. The selected set does not include all the skills and competencies that are important in this job.

SUMMARY OF MAIN RESPONSIBILITIES

- Responsibility for the Financial Performance of the Business
- Managing Change for Organizational Improvement
- Management of a Function (Including Managing a Cost
- Base)Planning: Both Medium Term (1-2 years) and Long-Term Strategic

CORE COMPETENCIES IDENTIFIED AS MOST IMPOR-TANT FOR THIS JOB

1.Fostering Teamwork

Definition: As a team member, the ability and desire to work cooperatively with others on a team; as a team leader, Interest, skill, and success in getting groups to learn to work together cooperatively

Behaviors for Team Members:

- Listens and responds constructively to other team members' ideas
- · Offers support for others' ideas and proposals
- Is open with other team members about his/her concerns
- Expresses disagreement constructively (e.g., by emphasizing points of agreement, suggesting alternatives that may be acceptable to the group)
- Reinforces team members for their contributions
- Gives honest and constructive feedback to other team members
- Provides assistance to others when they need it
- Works for solutions that all team members can support
- Shares his/her expertise with others
- Seeks opportunities to work on teams as a means to develop experience and knowledge

These pages are taken from a model for a senior management team. Shown to the left are:

1) An introduction and a summary of main responsibilities (the top page).

2) A listing of key responsibilities and performance measures (the middle page).

3) A listing of critical core competencies, with definitions (the bottom page).

The process for doing this model included some strategic planning that included the identification of existing core competencies, required competencies and the "gap". The competency dictionery, containing 35 competencies from which the models are developed, was reviewed and modified.

Starting with the executive group is the ideal way to implement a competency system. Actually going through the modeling process brings about understanding, ownership and commitment. Executives then see the competency system as a way to ensure that the right competencies are in place to carry out the business plan, and not just as a human resource activity.

To help demonstrate these payoffs for line executives, ask for our "Competencies and Competitiveness" and "ROI of Competency Technology" white papers.

Branch Manager Competencies (Develop)

Illustrates key points with concrete examples appropriate for the audience

d is prepared to answer the questions.

To the left are two pages illustrating the listing of required core competencies for a branch manager job. The top page lists two competencies to

"select for" and the bottom page lists several competencies that can be developed. The model contains eight to twelve critical core competencies developed through a combination of focus groups and behavioral event interviews.

COMPETENCIES THAT CAN BE DEVELOPED

RECRUITING AND SELECTION

Skill: The ability to recognize the competencies of candidates, and to staff the branch with those who display the immediate and long-term potential for high performance

OBSERVABLE BEHAVIORS

- Follows Applied's hiring policies.
 Uses competencies model for function to identify the abilities for which to select.
- Identifies sources of qualified candidates.
- Uses a screening process to select high potential candidates to interview.
- Asks the right questions to validate competencies. ٥
- Explains what the company offers. Describes the working conditions, key responsibilities, major tasks and performance measures
- of the job.
- Selects and hires the highest potential candidate.

SALES MANAGEMENT

Skill: The ability to develop and implement sales strategies that increase revenues, profitability, and customer satisfaction (Customer Jubilation).

OBSERVABLE BEHAVIORS

- Champions Applied's Cornerstone Strategy.
 Creates a branch business plan that defines the sales strategies.
- Implements sales strategies to increase volume and profitability in one's own current and ٥ potential accounts.
- Creates strategies with sales associates to build their business
- Π Develops the competencies of sales associates.
- Coaches sales associates to improve their performance. Ο
- Maximizes leverage on the selling process by entering the sales cycle at the appropriate time.
- Models effective selling competencies.
- Creates win-win outcomes by negotiating effectively.
- σ Forms teams of specialists to support the sales process Supports National Accounts activities.
- Develops alliances and partnerships with vendors and customers.

- Obtain marketing buy-in
- Coordinate pricing and plant buy-in

JOB MODEL FOR SALES PROFESSIONALS

INTRODUCTION

This job model includes:

- A summary of the main responsibilities
- A detailed description of the main responsibilities, showing key tasks and performance outcomes/measures
- The core competencies identified as most important for effectiveness in this job, with descriptions of specific behaviors contributing to effectiveness

Note that the core competencies for this job were selected from the larger set of 31 "building block" core competencies. The selected set of core competencies provides a focus for performance management and development for people in the job. The selected set does not include all the skills and competencies that are important in this job.

SUMMARY OF MAIN RESPONSIBILITIES

 $\ensuremath{\mathsf{l.Identifying}}$ and growing profitable business with existing and new customers

2.Maintaining and growing profitable core business3.Managing one's territory with internal customers and

suppliers

4.Managing commercialization of product development: new and maintenance projects

CORE COMPETENCIES IDENTIFIED AS MOST IMPORTANT FOR SALES PROFESSIONALS

Note: The number in parentheses following each competency title is the number in the list of 30 core competencies and in the Resources Guide.

A. Core Competencies Common to all Jobs

!. Fostering Teamwork (#3)

Definition: As a team member, the ability and desire to work cooperatively with others on a team; as a leader, Interest, skill, and success in getting groups to learn to work together cooperatively.

Behaviors for Team Members:

• Listens and responds constructively to other team members' ideas

- Offers support for others' ideas and proposals
- Is open with other team members about his/her concerns

• Expresses disagreement constructively (e.g., by emphasizing points of agreement, suggesting alternatives that may be acceptable to the group)

• Reinforces team members for their contributions

• Gives honest and constructive feedback to other team members.

• Provides assistance to others when they need it

These pages are taken from a model for a sales job in a manufacturing company. Shown to the left are:

1) An introduction and a summary of main responsibilities (the top page).

2) A listing of key responsibilities (the middle page).

3) A listing of critical core competencies, with definitions (the bottom page).

The model contains eight to twelve critical core competencies developed through a combination of focus groups and behavioral event interviews.

Organizations often start with competency models for sales positions because sales performance is usually easier to measure than performance in other positions. The difference between what a top performing sales person sells and what an average sales person sells is significant in most organizations, and translates directly into higher revenue and bottom-line impact. Most executives easily understand the payoff of having a competency model that reflects what top sales performers do, backed by selection, training and performance management processes that produce more top performers than average performers.

Our "ROI of Competency Technology" white paper cites research showing this payoff as it applies to sales positions.

Workitect Blueprints for Superior Performance

Information Systems Positions

Competency Models

Example: Analyst/Programmer

DETAILED DESCRIPTION OF MAIN RESPONSIBILITIES

I. Analysis

Main Tasks

- Data Modeling
- Identifying and Understanding Requirements
- Defining Scope

- Knows the appropriate people to go to for the best
- answers, gets them involved and makes decisionsProvides accurate, timely information; coordinates sched-
- ules to produce the productTracks the flow of product to ensure deadlines are met; follows up with business partners to ensure execution of plans
- Possesses strong sense of urgency (makes it happen)
- Maintains records in a logical, user-friendly system
- Delegates tasks and responsibilities to develop associates

Scaled Ratings

ad the column headed

Optional Formats for Competency Descriptions

Scaled Rating Form for People Managers (Leadership Practice Version)

Person being rated:	Rater:	Date:
---------------------	--------	-------

Instructions

The tables below are designed to help you accurately assess an individual's capability on 12 leadership practices. The first column displays the labels used to describe four levels of capability: 'Not Developed', 'Developing', 'Capable' and 'Outstanding'. Most practices have different aspects which have to be rated separately. In the example on the next 2 pages, the four aspects for Delivering Business Results are 'Setting Goals', 'Progressing Goals', 'Maximizing Value' and 'Concem for Standaids'. You are asked to rate each aspect and then make an overall rating for the Leadership Practice as a whole.

Two things are important in using this scale accurately. You should:

 \bullet be guided exclusively by the scale examples when making a judgment about a person's level of capability

authoritative sources

gain their support

the other person's boss)

erence to authoritative sources

is limited and often insensitive

and presenting relevant data

concerns

sources

does not support own position

ments) for all influence situations

· Does not address other arguments or evidence that

• Tends to use the same approach (e.g., logical argu-

• Rarely considers others' concerns when trying to

· Often uses heavy-handed influence strategies when

they are inappropriate (e.g., immediately appealing to

· Sometimes supports own position with data or ref-

Is usually ineffective in trying to address others' concerns, objections and alternative positions
Sometimes varies;approach to influencing but range

• Considers more obvious concerns of others but does not ask questions to learn about less obvious

 Typically supports a position with arguments which are internally consistent and based on authoritative

• Effectively responds to concerns, objections and alternative positions by offering counter arguments

 \bullet try to recall concrete examples of a person's behavior at work to support your rating

Make ratings by checking the appropriate box.

Novice

Developmental

Capable

Most job competency models include a description of each competency that includes observable behaviors which indicate the demonstration of that competency.

Some organizations prefer that each competency be described by levels of proficiency. The examples on this page show several variations, each with descriptions that range from a low level of proficiency to a superior level.

When doing models for multiple levels of a job category, an option preferred by some organizations is to describe the competency in terms indicative of the way it would be demonstrated at each job level. For example, the behavioral indicators of the competency of "fostering teamwork" may be somewhat different for a supervisor of manufacturing than for a vice president of manufacturing, even though the competency is common to both jobs.

These competency description variations can also be applied to organizations wanting to "certify" performers in a specific job category, such as customer service representatives or mechanics.

INTERVIEW QUESTIONS

OPENING QUESTIONS

Opening questions generate wonderful opportunities to probe and understand a candidate's thought process, skill level and accomplishments.

Try one of these: • Tell me about your business.

- Tell me about your company.
- How do you drive your business?

PROBES

Probes allow you to clarify more information which we need to make a decision about a candidate's fit within our organization. After asking a selection question, try to understand:

- 1) What prompted the candidate to take action?
- 2) What specific action did the candidate take?
- 3) What impact did the action have on business?
- 4) What did the candidate learn from that situation?

SELECTION QUESTIONS BASED ON COMPETENCIES

- Creativity
- Tell me where you trend shop for your business.
- What key designers do you look at as fashion pacesetters?
- What fashion trends do you see happening in women's apparel today?
- Describe a fashion trend that you translated into sellable product.
- How did you learn your business?
- Describe a new idea, source or process that you brought to your business that impacted sales or improved productivity of work

Not Hire Other Action

Interview guides can be created to assist interviewers in assessing competencies.

The top form on the left is used to rate the competencies of a job candidate during and after the actual interview and summarize the assessment of the candidate. In this organization, a form was created for each job category for which a competency model had been developed.

The bottom page is one page taken from a manual used to train and guide interviewers, most of whom are line managers. Asking the suggested questions will elicit information necessary to evaluate the competencies of a candidate.

Training in a special interviewing technique to assess competencies is also available and is recommended. Contact us for more information about this training or for information about competencybased selection systems implemented for other organizations.

The top page on the left is the front form used to help employees establish goals and the bottom page is the back of that form. The "Goals and Results" page is customized for each major job category, the one shown being for a Buyer job. This organization believes that there needs to be clarity and consistency in the goals set for each major job category.

The back side of the form lists competencies for each specific job along with a rating template. Supervisors are trained to assess and rate performance and competencies and to complete the form properly.

Many different formats are possible. The important thing is to create a system that is compatible with the organization's way of doing business and to ensure that people get feedback on the degree to which the required competencies are being demonstrated on the job.

For more information about performance management systems, ask for a reprint of Ed Cripe's article in ACA News titled "Making Performance Management a Positive Experience", a description of our "Managing Performance-With Competence" training program and/or project profiles describing systems we have implemented for other organizations.

Instructions: If there are competencies identified for your job, check these competencies in column A. Read the definition and behaviors for each competency, beginning on page 23. Then check any boxes that apply in columns B-G. After completing this process for all 31 competencies, use column G to select 3 competencies to target for your personal development.

Flexibility

• Any competency system that we create can be put on-line and be made compatible with your existing or planned information system.

• We do not have a "standard"

software package that you have to force-lift into your system. Nor do you have to modify your system to fit our specifications.

• Each organization has different needs and system capabilities, which makes customization the only way to go.

• Workitect will work with your IS people to see that you get a system that is userfriendly at a reasonable cost.
